

Video Game Builders 3D™

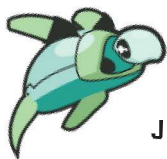

For new and continuing students in grades K-2 and 3-6

Fridays from 3:30 PM to 4:30 PM (11 weeks)
March 16, 2018 to June 8, 2018

Video Game Builders 3D™ empowers all children to create their own interactive video games! Children develop interactive storyboards to describe their game, creating physical representations of worlds and characters from their imagination. They transfer the logic and design into special video game creation software, and learn coding skills to manage behaviors and events! The result is a customized video game to play and share! Parents receive a link to projects and free software!

**Create and play
your own amazing
video games!**

**New kid-friendly themes
and activities every session!**

**Bring your imagination to life!
Join us for Video Game Builders 3D!**

**Bell
School**

**Space is limited.
